JOURNAL

OF THE

AMERICAN SOCIETY

OF

SUGAR BEET TECHNOLOGISTS

EXECUTIVE COMMITTEE — 1972–73

President ..... R. T. Johnson
Spreckels Sugar Company
San Francisco, California

Vice-President ..... Hugh G. Rounds
The Amalgamated Sugar Company
Ogden, Utah

Secretary-Treasurer ..... James H. Fischer
Beet Sugar Development Foundation, Fort Collins, Colorado

Immediate Past President ..... Lloyd W. Norman
U & I Incorporated
Salt Lake City, Utah

BOARD OF DIRECTORS — 1972–73

Pacific Coast Region: ..... E. M. Hartmann
Intermountain Region: ..... Julian R. Johnson
Eastern Rocky Mountain Region: ..... Clair H. Iverson
North Central and Great Lakes Region: ..... Jerold L. Brown
Canada: ..... Peter Bergen
Processing at Large: ..... John R. Corsberg
Agricultural at Large: ..... D. L. Oldemeyer

EXECUTIVE COMMITTEE — 1974–75

President ..... Hugh G. Rounds
The Amalgamated Sugar Company
Ogden, Utah

Vice-President ..... Glen W. Yeager
Holly Sugar Corporation
Colorado Springs, Colorado

Secretary-Treasurer ..... James H. Fischer
Beet Sugar Development Foundation, Fort Collins, Colorado

Immediate Past President ..... R. T. Johnson
Spreckels Sugar Division, Amstar Corporation
San Francisco, California

BOARD OF DIRECTORS — 1974–75

Pacific Coast Region: ..... Lauren Burtch
Intermountain Region: ..... D. L. Oldemeyer
Eastern Rocky Mountain Region: ..... D. D. Dickenson
North Central and Great Lakes Region: ..... Ulrich Hillmer
Canada: ..... Herbert M. Hayward
Processing at Large: ..... William W. Barr
Agriculture at Large: ..... Roger Wyse

AUTHOR INDEX

AkesWR
Akeson, W. R.
Effect of pile covering on weight and sugar shrink in pile rims----------18 (2) 108
Reduction of sugar loss in sugarbeet piles with straw and plastic covering----------18 (2) 116
Effect of topping procedure on beet quality and storage losses----------18 (2) 125
Predicting sugarbeet storage losses using regression analysis----------18 (2) 182

AlleHP
Alley, H. P.
Economic comparison of herbicides for weed control in sugarbeets----------17 (1) 58

AndeFN
Anderson, F. N.
Uptake patterns of N tagged nitrate by sugarbeets related to soil nitrate level and time----------17 (1) 42

BarnMG
Barnes, M. G.
Predicting sugarbeet storage losses using regression analysis----------18 (2) 182

BeatKD
Beatty, K. D.
A technique for testing and selecting for salt tolerance in sugarbeet----------17 (4) 295

BeckCF
Becker, C. F.
Sugarbeet plant spacing-thinning considerations and a space-planter----------17 (2) 165

BonnOV
Bonney, O. V.
Studies on the continuous inversion of sucrose: I, research date----------17 (3) 187

BosmSM
Bosma, S. M.
Effect of nitrogen and irrigation on sugarbeets production in South Idaho----------17 (1) 5
Predicting nitrogen fertilizer needs for sugarbeets from residual nitrate and mineralizable nitrogen----------18 (3) 232
Effect of row spacing and nitrogen rate on root and sucrose yield of sugarbeets in Southern Idaho----------18 (3) 274

BrimhP
Brimhall, P.
Survey of sugar beet production practices in Ohio and their effect on sugar beet quality and yield----------17 (3) 254

BugbWM
Bugbee, W. M.
New planters for experimental sugarbeet plots----------17 (3) 220

BurbaM
Burba, M.
Evaluation of the sugar beet according to its technical quality----------18 (4) 360
BurtLM
Burtch, L. M.
From research results to field performance- Why the gap?----------18 (2) 136
CartJN
Carter, J. N.
Effect of nitrogen and irrigation on sugarbeets production in South Idaho----------17 (1) 5
Predicting nitrogen fertilizer needs for sugarbeets from residual nitrate and mineralizable nitrogen----------18 (3) 232
Effect of row spacing and nitrogen rate on root and sucrose yield of sugarbeets in Southern Idaho----------18 (3) 274
Effect of irrigation method and late season nitrate-nitrogen concentration on sucrose production by sugarbeets----------18 (4) 332
CoeGE
Coe, G. E.
New planters for experimental sugarbeet plots:----------17 (3) 220
CoonGH
Coons, G. H.
Interspecific hybrids between *Beta vulgaris* L. and the wild species of *Beta* ----------18 (4) 281
CosteD
Costesso, D.
The spectral photometric determination of sucrose in sugar beets and sugar beet products via specific enzyme systems-------18 (4) 349
CronCH
Cronin, C. H.
NC8438, a promising new broad spectrum herbicide for sugarbeet----------17 (2) 134
DaniRE
Danielson, R. E.
Yield and economic implications of sugarbeet production as influenced by irrigation and nitrogen fertilizer---------18 (1) 34
DayMG
Day, M. G.
Predicting sugar content and petiole nitrate of sugarbeets from soil measurements of nitrate and mineralizable nitrogen------17 (2) 126
DickWA
Dickinson, W. A., Jr.
The effect of ammonic-N or nitrate-N dominated fertilizer programs on the nitrogen and sucrose content of sugar beet tissues and yields of sugarbeets------18 (2) 163

DoneDL
Doney, D. L.
The effects of *heterodera schachtii* and *aphanomyces cochlioides* on root-rot----------17 (3) 240
The effects of soil types, inoculum levels, fertilizers, and water regimes on the development of *Heterodera schachtii* on selected lines of sugarbeet----------17 (4) 309
Individual plant selection in nematode-infested soil----------17 (4) 375
DotzAK
Dotzenko, A. K.
Evaluation of conservation tillage effectiveness on sugarbeet fields in Northeastern Colorado----------18 (4) 307
EhliCF
Ehlig, C. F.
A technique for testing and selecting for salt tolerance in sugarbeet----------17 (4) 295
EisFG
Eis, F. G.
Experiences with the enviro-clear system for rapid clarification of first carbonation effluent----------17 (2) 105
EkinWL
Ekins, W. L.
NC8438, A promising new broad spectrum herbicide for sugarbeet----------17 (2) 134
FinkRE
Finkner, R. E.
Sugarbeet cultivar and systemic insecticide interrelationships in the control of curly top virus----------17 (2) 97
Interrelationships of applied nitrogen, applied zinc, plant population, and frequency of irrigation on yield and quality of sugarbeets----------17 (4) 358
FiscBB
Fischer, B. B.
From research results to field performance-Why the gap?----------18 (2) 136
FornKJ
Fornstrom, K. J.
Sugarbeet plant spacing-thinning considerations and a space-planter----------17 (2) 165
FoxSD
Fox, S. D.
Effect of pile covering on weight and sugar shrink in pile rims----------18 (2) 108
Reduction of sugar loss in sugarbeet piles with straw and plastic covering----------18 (2) 116
Effect of topping procedure on beet quality and storage losses----------18 (2) 125
FuehHD
Fuehring, H. D.
Interrelationships of applied nitrogen, applied zinc, plant population, and frequency of irrigation on yield and quality of sugarbeets----------17 (4) 358

GaskJO
Gaskill, J. O.
Plastic isolation chambers for sugarbeet seed production----------18 (3) 264
GateCM
Gates, C. M.
Response of weeds and sugarbeets to EP-475, a phenmedipham analog----------17 (1) 53
GileJF
Giles, J. F.
Effect of harvest area and replication on detection of treatment differences in sugar beet field experiments----------18 (1) 24
GrifGD
Griffin, G. D.
Evaluation of systemic pesticides in controlling sugarbeet leafhopper----------17 (4) 354
HaddJL
Haddock, J. L.
Regression analysis of chemical measurements on hybrid sugarbeets to root yield, sugar percentage and impurity index--------18 (3) 214
HaskDR
Haskell, D. R.
Studies on the continuous inversion of sucrose: II, application of research data----------17 (3) 195
HeckRJ
Hecker, R. J.
Nitrogenous compounds in sugarbeet juices------17 (2) 154
Plastic isolation chambers for sugarbeet seed production----------18 (3) 264
HendLW
Hendrick, L. W.
Selective use of phenmedipham and EP-475 in Michigan for weed control in sugarbeets----------18 (2) 97
HenrJE
Henry, J. E.
Progress report on sugarbeet emergence studies----------17 (1) 30
HeplPR
Hepler, P. R.
A field study of three growth retardants on sugarbeets----------17 (4) 315
HillFJ
Hills, F. J.
Effects of spacing on sugarbeets in 30 inch and 14-26 inch rows----------17 (4) 300
HirumH
Hirumi, H.
Search for causative agents of the sugarbeet yellow wilt in Chile----------18 (2) 142

JensME
Jensen, M. E.
Effect of nitrogen and irrigation on sugarbeets production in South Idaho-------17 (1) 5
Predicting nitrogen fertilizer needs for sugarbeets from residual nitrate and mineralizable nitrogen----------18 (3) 232
Effect of row spacing and nitrogen rate on root and sucrose yield of sugarbeets in Southern Idaho----------18 (3) 274
JesiVM
Jesic, V. M.
Optimization of sugar-end processing----------17 (2) 115
The effects of processing conditions on carbonation elimination----------17 (2) 180
Optimum carbonation system design----------17 (3) 212
KarrJ
Karr, J.
The determination of sucrose in concentrated steffen filtrate by G.L.C.----------18 (1) 53
KibraT
Kibraeb, T.
Yield and economic implications of sugar-beet production as influenced by irrigation and nitrogen fertilizer---------18 (1) 34
KroeME
Kroetz, M. E.
Survey of sugar beet production practices in Ohio and their effect on sugar beet quality and yield----------17 (3) 254
KukaRD
Kukas, R. D.
From research results to field performance - Why the gap?----------18 (2) 136
LangeA
Langen, A.
The rheometer automatic boiling control system, a new process for the fully automatic execution of the boiling process----------18 (3) 187
LaufeH
Laufersweiler, H.
Response of weeds and sugarbeets to EP-475, a phenmedipham analog----------17 (1) 53
LeeGA
Lee, G. A.
Economic comparison of herbicides for weed control in sugarbeets----------17 (1) 58
LewRB
Lew, R. B.
Atomic absorption analysis of heavy metals in factory water and granulated sugar------17 (2) 144
Interference of nitrite in the iodometric determination of sulfite----------18 (3) 252

LudwAE
Ludwick, A. E.
Effect of harvest area and replication on detection of treatment differences in sugar beet field experiments----------18 (1) 24
McFaJS
McFarlane, J. S.
Naturally occurring hybrids between sugar-beet and *beta macrocarpa* in the Imperial Valley of California----------18 (3) 245
MaagGW
Maag, G. W.
Nitrogenous compounds in sugarbeet juices------17 (2) 154
False polarization: quantitation and characterization in sugarbeet processing juices----------18 (3) 257
MeggWF
Meggitt, W. F.
Selective use of phenmedipham and EP-475 in Michigan for weed control in sugar-beets----------18 (2) 97
MensHA
Menser, H. A.
Response of sugarbeet cultivars to ozone-------18 (1) 81
MillPH
Miller, P.H.
Seasonal variations in the nonsucrose content of several straight house process streams----------17 (1) 67
MoraJT
Moraghan, J. T.
Soil water use by transplanted and field-sown sugarbeets----------17 (1) 15
Sugarbeet production in the Red River Valley as affected by population and nitrogen fertilizer----------17 (3) 260
MumfDL
Mumford, D. L.
Evaluation of systemic pesticides in controlling sugarbeet leafhopper----------17 (4) 354
Procedure for inducing curly top epidemics in field plots----------18 (1) 20
NelsJM
Nelson, J. M.
Effect of spacing in 14-26 inch rows on production of fall planted sugarbeets------18 (1) 76
NichMK
Nicholson, M. K.
Yield and economic implications of sugar-beet production as influenced by irrigation and nitrogen fertilizer---------18 (1) 34
NormLW
Norman, L. W.
The determination of sucrose in concentrated steffen filtrate by G.L.C.----------18 (1) 53

OhkiK
Ohki, K.
Sugarbeet growth and development under controlled climatic conditions with reference to night temperature----------17 (3) 270
OldeRK
Oldemeyer, R. K.
Introgressive hybridization as a breeding method in *Beta Vulgaris*----------18 (3) 269
OldJFT
Oldfield, J. F. T.
Simultaneous determination of phosphoric acid and organic acids in beet process juices and molasses----------18 (1) 6
OlsoRA
Olson, R. A.
Uptake patterns of N tagged nitrate by sugarbeets related to soil nitrate level and time----------17 (1) 42
PairCH
Pair, C. H.
Effect of irrigation method and late season nitrate-nitrogen concentration on sucrose production by sugarbeets--------18 (4) 332
ParslR
Parslow, R.
Simultaneous determination of phosphoric acid and organic acids in beet process juices and molasses----------18 (1) 6
PazdKJ
Pazdernik, K. J.
New planters for experimental sugar-beet plots----------17 (3) 220
PenceN
Pence, N.
Predicting sugarbeet storage losses using regression analysis----------18 (2) 182
PenneD
Penner, D.
Selective use of phenmedipham and EP-475 in Michigan for weed control in sugarbeets----------18 (2) 97
PeteGA
Peterson, G. A.
Uptake patterns of N tagged nitrate by sugarbeets related to soil nitrate level and time----------17 (1) 42
PottHS
Potter, H. S.
Tests with soil treatments and crown sprays to control rhizoctonia crown and root rot of sugarbeet----------18 (1) 45
RamanJ
Ramanauskas, J.
Studies on the continuous inversion of sucrose: III, physical installation-------17 (3) 200

ReusJO
Reuss, J.O.
Effect of harvest area and replication in detection of treatment differences in sugarbeet field experiments----------18 (1) 24
RichAW
Richards, A. W.
Effect of nitrogen and irrigation on sugarbeets production in South Idaho----------17 (1) 5
Predicting sugar content and petiole nitrate of sugarbeets from soil measurements of nitrate and mineralizable nitrogen------17 (2) 126
RiesJH
Riesselman, J. H.
The residual activity of TBZ or benomyl against *Cercospora Beticola* in sugarbeets-----17 (4) 319
RoberS
Roberts, S.
Predicting sugar content and petiole nitrate of sugarbeets from soil measurements of nitrate and mineralizable nitrogen---------17 (2) 126
RuffBJ
Ruffing, B. J.
Effect of nitrogen and irrigation on sugarbeets production in South Idaho-------17 (1) 5
RussFB
Russell, F. B.
Survey of sugarbeet production practices in Ohio and their effect on sugar beet quality and yield----------17 (3) 254
RyseGK
Ryser, G. K.
Regression analysis of chemical measurements on hybrid sugarbeets to root yield, sugar percentage and impurity index--------18 (3) 214
A weather index method and temperature distribution applied to sugarbeet yields and sugar percentage----------18 (4) 312
SchmWR
Schmehl, W. R.
Effect of harvest area and replication on detection of treatment differences in sugarbeet field experiments----------18 (1) 24
SchmiWH
Schmidt, W. H.
Survey of sugar beet production practices in Ohio and their effect on sugar beet quality and yield----------17 (3) 254
SchnCL
Schneider, C. L.
Development of methodology for the production of *aphanomyces cochlioides* oospores *in vitro*----------17 (3) 230
Tests with soil treatments and crown sprays to control rhizoctonia crown and root rot of sugarbeet----------18 (1) 45

SchKWR
Schoenrock, K. W. R.
The spectral photometric determination of sucrose in sugar beets and sugar beet products via specific enzyme systems----------18 (4) 349
ScotPR
Scott, P. R.
Sugarbeet cultivar and systemic insecticide interrelationships in the control of curly top virus----------17 (2) 97
SequRM
Sequeira, R. M.
Some aspects of carbohydrate analyses by GLC techniques----------17 (1) 80
ShoreM
Shore, M.
Simultaneous determination of phosphoric acid and organic acids in beet process juices and molasses----------18 (1) 6
SimmSR
Simmons, S. R.
Evaluation of conservation tillage effectiveness on sugarbeet fields in Northeastern Colorado----------18 (4) 307
SislGH
Sisler, G. H.
False polarization: quantitation and characterization in sugarbeet processing juices----------18 (3) 257
SnydFW
Snyder, F. W.
Water requirement for maximum germination and emergence of sugarbeet seeds----------17 (4) 323
Impurities in sugarbeet crown and root----------18 (1) 60
Maturity effects on fruit characteristics, germination, and emergence of sugarbeet----18 (1) 87
Leaf and root accretion by sugarbeet seedlings in relation to yield----------18 (3) 204
SoinOC
Soine, O. C.
Effect of six four-year rotations on yield, quality, and monetary return of sugarbeets----------17 (3) 246
SteeAE
Steele, A. E.
Evaluation of cyst selection as a means of reducing variation in sugarbeet nematode inocula----------17 (1) 22
StouEL
Stout, E. L.
Effect of pile covering on weight and sugar shrink in pile rims----------18 (2) 108
Effect of topping procedure on beet quality and storage losses----------18 (2) 125

SullEF
Sullivan, E. F.
Efficacy of preplant/postemergence weeding systems on sugarbeet, 1968-72----------17 (4) 345
TheuJC
Theurer, J. C.
Regression analysis of chemical measurements on hybrid sugarbeets to root yield, sugar percentage and impurity index----------18 (3) 214
ThielH
Thiele, H.
The rheometer automatic boiling control system, a new process for the fully automatic execution of the boiling process----------18 (3) 187
ThomJP
Thomas, J. P.
Studies on the continuous inversion of sucrose: I, research data----------17 (3) 187
TiedeP
Tiedeman, P.
Sugarbeet production in the Red River Valley as affected by population and nitrogen fertilizer----------17 (3) 260
TorkeR
Torkelson, R.
Soil water use by transplanted and field-sown sugarbeets----------17 (1) 15
Sugar beet production in the Red River Valley as affected by population and nitrogen fertilizer----------17 (3) 260
UlricA
Ulrich, A.
Sugarbeet growth and development under controlled climatic conditions with reference to night temperature----------17 (3) 270
Boron tolerance of sugar beets in relation to the growth and boron content of tissues----------17 (3) 280
UrbinC
Urbina-Vidal, C.
Search for causative agents of the sugarbeet yellow wilt in Chile----------18 (2) 142
VanDDM
VanDoren, D. M., Jr.
Progress report on sugarbeet emergence studies----------17 (1) 30
VlamiJ
Vlamis, J.
Boron tolerance of sugar beets in relation to the growth and boron content of tissues----------17 (3) 280

WeavWH
Weaver, W. H.
Predicting sugar content and petiole nitrate of sugarbeets from soil measurements of nitrate and mineralizable nitrogen----------17 (2) 126
WeihJL
Weihing, J. L.
The residual activity of TBZ or benomyl against *cercospora beticola* in sugarbeets----------17 (4) 319
WestDT
Westermann, D. T.
Predicting nitrogen fertilizer needs for sugarbeets from residual nitrate and mineralizable nitrogen----------18 (3) 232
Effect of irrigation method and late season nitrate-nitrogen concentration on sucrose production by sugarbeets----------18 (4) 332
WheeLL
Wheelock, L. L.
The effects of processing conditions on carbonation elimination----------17 (2) 180
WhitPA
Whitaker, P. A.
Nitrogenous compounds in sugarbeet juices------17 (2) 154
WhitED
Whitney, E. D.
The effects of *heterodera schachtii* and *aphanomyces cochlioides* on root-rot----------17 (3) 240
The effects of soil types, inoculum levels, fertilizers, and water regimes on the development of *heterodera schachtii* on selected lines of sugarbeet----------17 (4) 309
Individual plant selection in nematode-infested soil----------17 (4) 375
WintSR
Winter, S. R.
Influence of nitrogen placement and source on surface nitrate accumulation and sugarbeet production----------18 (4) 343
